PRESS OF J. W. PRATT & SON, 73-79 FULTON ST., N. Y.

I take pleasure in presenting you herewith my new *ILLUSTRATED CATALOGUE OF BELLHANGERS' AND LOCKSMITHS' SUPPLIES,* and desire to call the attention of the Trade to the *many new goods I have added to this line,* as also to the *superior finish* and *richness of metal* in goods of my manufacture.

Knowing the *increasing demand* for *Iron Hardware to imitate the Genuine Bronze Metal* and other higher grades, I have prepared a line of the *most saleable goods,* and can furnish same in the regular *Standard Iron finishes.*

In addition to the articles described in this book, I also manufacture *Patent Spring Hinges* and a complete line of *Regular and Fine Builders' Hardware,* as also *Refrigerator and Ice Box Trimmings.*

I shall continue *without delay* to issue *circulars* and *catalogues* of all other goods of my manufacture, not contained in this book, so as to keep my customers informed of the *large variety* of *specialties* and the many *new styles* of *Fine Hardware* I am constantly adding to this line.

Meanwhile it will suffice to say that *any article* pertaining to the line of *Builders' Hardware* can be had of *my own manufacture* and at the lowest possible prices.

Soliciting your favors, I am

Respectfully,

FRANCIS KEIL.

1889.

Electric Bells.

THE LUNGEN BELL.

No. 1602.

By the improved method of construction (**patented**) we are enabled to offer a **first-class** article at a very **low price.** The base is stamped, has ribbed edges, making it strong, light and compact. By a novel arrangement the ball and hammer-rod is connected to the armature so that it cannot work loose. They are **entirely nickel plated.**

SIZES.....**2½** inch. **3** inch. **3½** inch. **4** inch.
PRICE, EACH .....

IRON BOX BELL.

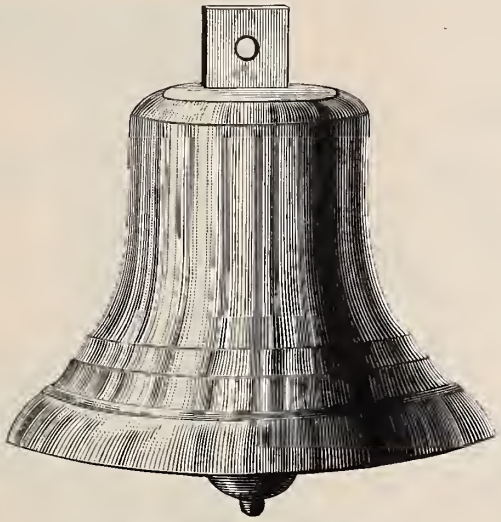

No. 1603.

This bell has pivoted armature adjustment for both tension and break circuit. Heavy platinum points are riveted in both screw and spring. The washer on the hammer-rod covers the hole in which the rod vibrates, keeping the box free from dust and insects. It is in every respect a perfect bell.

SIZES.....**2½** inch. **3** inch. **3½** inch. **4** inch.

Electric Batteries and Battery Materials.

NOTICE.—In ordering, always designate the Batteries or Parts by the **Names** given below.

Cut of the Battery complete.

Prices of the "AXO" and Parts.

Cell complete	$.....
Porous Cup alone	.....
Glass Jar	.....
Zinc	.....
Sal Ammoniac, per bag	.....
Cell complete, *hermetically sealed*	.....

Cut of the Porous Cup.

The "**AXO**" is the first **real** improvement in Porous Cup Batteries since the invention of the Leclanché, and is rapidly supplanting the old forms, over which it has many advantages. The porous cup forms a cover for the jar, which can be easily *sealed* if desired. The carbon is ventilated along its whole length, and the carbon connection can be removed and replaced at will.

Cut of Battery complete.

Prices of the "GONDA" and Parts.

Cell complete	$.....
Porous Cup alone	.....
Glass Jar	.....
Zinc	.....
Sal Ammoniac, per bag	.....

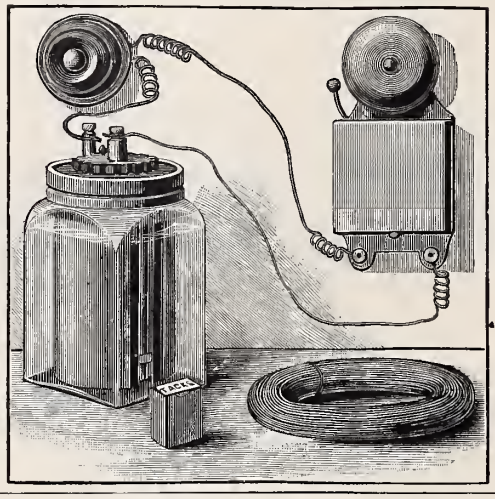

Cut of Porous Cup and Zinc.

The "**GONDA POROUS CUP BATTERY**" is the *genuine Leclanché Battery*, and is greatly superior to the imitations of it which are made all over the country, and which—like other cheap and poor electrical apparatus—fail to give satisfaction.

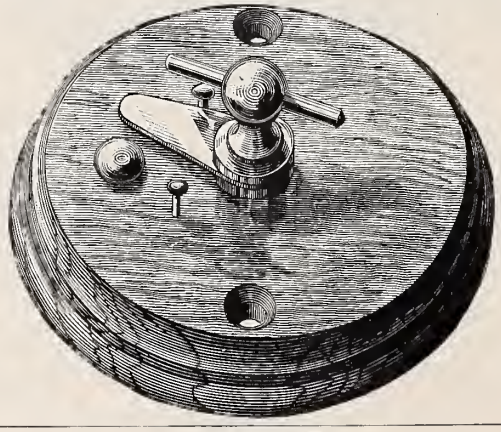

Send to us and be sure you are getting the genuine Cell, with the trade-mark "GONDA."

Electric Bell Sets.
